PROFILE

CI/CD Tools and DevOps Specialist with over 10 years of experience administering and optimizing enterprise collaboration and automation platforms including Jenkins, Jira, Confluence, Bitbucket, and ALM. Skilled in integrating and maintaining DevOps ecosystems to enhance productivity, streamline deployment workflows, and improve system reliability. Adept at supporting agile teams, managing tool administration, and implementing automation to deliver scalable and efficient solutions.

KEY SKILLS

- CI/CD & Tools Administration: Jenkins, Bitbucket, Jira, Confluence, ALM, GitLab, Azure DevOps, Nexus, GitHub Actions
- Cloud & Infrastructure: Azure, AWS, Kubernetes (AKS, GKE), Docker, Terraform, Ansible, VMWare
- Automation & Scripting: Bash, PowerShell, Python, Groovy, JavaScript, Airflow
- Databases & Monitoring: PostgreSQL, MySQL, Oracle, AppDynamics
- Methodologies: Agile/Scrum, DevSecOps, Infrastructure as Code

WORK EXPERIENCE

05/2024 – present
Riyadh, Saudi Arabia

DevOps Specialist NorConsult Telematics

- Administered and optimized Jenkins pipelines for CI/CD, integrating with Azure DevOps and AKS, improving deployment efficiency by 70%.
- Supported and maintained Jira and Confluence environments, ensuring smooth collaboration for agile teams.
- Automated multiple test frameworks (Selenium, etc.), reducing testing time by 60%.
- Managed Bitbucket repositories and integrated them into enterprise CI/CD workflows.
- Implemented AI/ML pipelines on AKS, leveraging Azure DevOps for deployment.

05/2020 – 02/2024
Bengaluru, India

DevOps Architect EY Global Delivery Services

- Led enterprise Jenkins, Bitbucket, and Confluence integration projects, improving collaboration across global teams.
- Automated JupyterHub provisioning using Terraform and Ansible, enhancing deployment efficiency by 50%.
- Implemented Jira workflows and ALM integrations for DevSecOps adoption in EY's Global Tax Platform, boosting deployment efficiency by 25%.
- Directed a team of 5 engineers to build cloud-native infrastructure with IaC (Terraform, Docker).
- Acted as the primary liaison for collaboration tools, optimizing cross-team communication.

WORK EXPERIENCE

08/2016 – 04/2020
Bengaluru, India

Senior DevOps Engineer Beckman Coulter India Pvt Ltd

- Streamlined CI/CD pipelines with TeamCity and Jenkins, reducing deployment time by 50%.
- Managed Bitbucket repositories and Jira projects to support agile delivery.
- Designed secure database deployments and integrated encryption into CI/CD processes.
- Developed Chef recipes and integrated with AWS CloudFormation for automated releases.

04/2014 – 07/2016
Bengaluru, India

Technical Leader Wipro

- Built Jenkins pipelines for deploying microservices to on-premises Linux VMs.
- Administered Jira projects and customized workflows for client-specific requirements.
- Developed Ansible playbooks for database refreshes, improving release efficiency.

04/2011 – 04/2014
Guadalajara, Mexico

IT Analyst Tata Consultancy Services

- Administered over 100 Oracle Databases, which ensured optimal performance and reliability for a major retail client in the US while working from near shore Mexico.
- Led a team of 10 engineers in a critical migration project, which exceeded delivery expectations by 20%, demonstrating our ability to meet and surpass client needs.
- Coordinated Disaster Recovery Exercises for more than 50 databases, enhancing system reliability by 25% and minimizing potential downtime risks.
- Collaborated with UNIX and storage teams to automate storage provisioning, significantly reducing turnaround time and streamlining operations for the entire team.

06/2007 – 10/2010
Bengaluru, India

Senior Systems Engineer Infosys Technologies

- Provided continuous 24/7 operational DBA support for Oracle databases at Pfizer, which ensured high availability and optimal performance for the US-based pharmaceutical giant.
- Successfully upgraded multiple Oracle versions, enhancing system efficiency and reliability, which contributed to smoother operations and improved user satisfaction.
- Implemented Oracle Enterprise Manager (OEM) for over 100 databases, which reduced resolution time by 50% and allowed the team to address issues more quickly and effectively.
- Managed backups and recoveries, coordinating with Iron Mountain for secure tape storage, which ensured data security and compliance with industry standards.
